Total Addressable Market

Total Addressable Market (TAM) calculation:

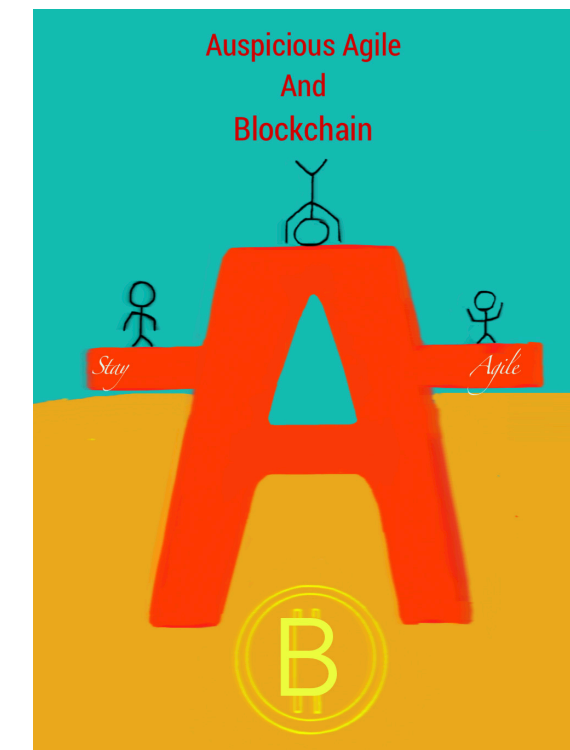

- ❑ Fast growing and urbanizing population: consumers and businesses spending expect to reach \$6.6 trillion by 2030 from \$4 trillion in 2015 – 65% growth.
- ❑ Auspicious Agile & our ScanPay platform expect to charge a fee ~2% for every money movement transaction using the platform
- ❑ In 2023 based on a consistent growth year over year Auspicious Agile & Blockchain (AA&B) projecting 1% of the market:
 - ❑ \$53.87 billion in Consumer & business spending (representing 1% of total)
 - ❑ Two percent of fees would give us \$1.08 billion in revenues for the AA&B African funding business in 2023
 - ❑ Conservatively at half of the market penetration (.5%) fee revenues in 2023 this would give us **\$540 million** in revenues
- ❑ Assuming we are able to capture 1% of all of the projected \$6.6 trillion of consumer and business spending projected by Brookings Institute by 2030
 - ❑ So this would be \$66 billion of Africa's consumer and business spending (including .5% growth in market share over 2023)
 - ❑ Two percent of this will be **\$1.32 billion** in transaction fee based revenue for the Auspicious Agile & Blockchain - ScanPay Platform
- ❑ In a more aggressive scenario achieving 5% of the 2030 African consumer and business spending market Auspicious Agile & Blockchain would achieve **\$6.6 billion** in revenues

Investment Platform

Pay

+

**Capturing
Potential for
the Developing
World**

* ScanPay is a proven existing US payment platform
